

Flex Your Finishing Power

Sunmight Flex Foam Sanding Disc— The Path to Perfection

The flexible foam backing and special coating ensure excellent contact and prevent deep scratches.

The multi-hole design minimizes clogging and reduces swirl marks.

FLEX FOAM SANDING DISCS

Sunmight Flex Foam Sanding Discs, with their unique stearate coating and flexible foam backing, provide optimal contact on curved surfaces, preventing deep scratches and ensuring even pressure distribution. The multi-hole design minimizes clogging and reduces swirl marks, making them suitable for both wet and dry sanding.

Technical Specifications

Grain	Premium Aluminum Oxide
Backing	Film, Sponge with Grip
Bond	Resin over Resin
Coating	Semi-Close with Stearate Coating
Grit	600 ~ 1000

Application

Automotive Aerospace Marine Wood

Key Benefits

Superior Flexibility

The highly flexible foam backing ensures excellent contact with the surface, resulting in even pressure distribution and a flawless finish.

Anti-clogging

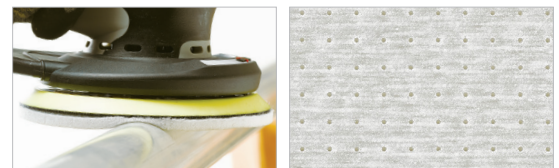

Special stearate coating and multi-hole design minimize clogging and reduces swirl marks.

Wet or Dry Use

You can use them wet or dry to achieve the desired finish.

User-Friendly

Sunmight Flex Foam Sanding discs are easy to use and deliver professional results.
